

Mobile Payment Services

We've all been there. You're out to dinner with a friend and they forgot their wallet. Thankfully, using a mobile payment service such as Venmo or PayPal, they send you money and you end the night with some money in your pocket. Well... almost.

These common mobile payment services are great for sharing payments, but they can also be the source of unclaimed money. If you forget to transfer your balances to your bank account after a certain period of time, the funds can be turned over to my office as unclaimed.

Use this newsletter as a reminder to check in on these accounts and ensure money isn't sitting idle. In fact, year end is a great time to check on all your financial accounts.
